SUMMARY

Enthusiastic and motivated BIM student currently developing skills in programming, web development, and emerging technologies. Seeking an IT internship to apply for academic knowledge, enhance technical skills, and contribute to innovative projects. Eager to learn, adapt, and contribute to innovative IT projects while expanding technical and problem-solving abilities. Interested in software development, testing, and web designing.

SKILLS

Database Management: MYSQL

Programming Language: C, HTML, CSS, JavaScript, React.js

Frameworks & tools: .NET, Flutter, VS Code, WordPress

Design: Wireframing, Prototyping(basic)

Creative Skills: Report Writing, Story-Telling, Creative Problem Solving

EDUCATION

Bachelor's In Information Management (BIM)

National College of Computer Studies (NCCS)

(2021 - Present)

Intermediate (+2)

National College of Computer Studies (NCCS)

(2019 - 2021)

CERTIFICATION

- OOP with Java Project Presentation
 - Data Structures and Algorithms Project Presentation
 - Web Technology-II Project Presentation
 - WordPress Project Presentation
 - Python Project Presentation
 - Flutter Project Presentation
 - Quality Assurance Project Presentation
-

PROJECTS

Travel Management System

- PHP, MySQL, Bootstrap
- Developed a full-stack tourism system with secure user authentication, real-time package availability, and admin dashboard.
- Implemented responsive design and efficient booking management for both users and administrators.

Automation Testing – Merojob

- Developed an automated web testing suite using Playwright to validate login flows and UI interactions.
- Implemented Page Object Model (POM) architecture for improved maintainability and code reusability.
- Performed cross-browser testing to ensure consistent performance across different browsers.
- Integrated automated test execution and reporting into CI/CD pipelines for continuous delivery.
